#### Improved by you

After listening to feedback from our customers, we've enhanced Wacom Cintiq Pro 16 to help boost your creative output.

#### Time-saving ExpressKeys™

Our new physical ExpressKeys are now positioned at the rear edge of the display, so there's no compromise on screen size when you're getting to work on your canvas. Designed for more efficient working, the ExpressKeys help to give you the time you need to add that extra level of polish to every project.

#### No more unintended touches

To avoid a stray button tap interrupting your workflow, we've refined the display to give you greater control. A new button ensures the touch function only switches on/off when you need it.

#### Connect and play

Linking Wacom Cintiq Pro 16 to your Mac or PC is effortless. All you need to do is connect the USB-C and HDMI cables – whether at your desk or on your lap.

#### Bring a natural precision to every pixel

Our anti-glare 4K screen and Pro Pen 2 work in harmony to create a completely natural pen-on-screen experience and delivers vivid color with 98% Adobe® RGB. Every stroke you make on the screen's etched glass surface gives you that realistic sensation of pen on paper. And with built in pressure sensitivity, virtually lag-free tracking and superior tilt capabilities, Wacom Pro Pen 2 not only looks like a pen, it feels like one too.

#### Create in comfort

As a creative professional, it pays to be comfortable at your desk. The new VESA mount enables you to mount your device to our optional Adjustable Stand (or other third-party arms) for enhanced stable support of your Wacom Cintiq Pro 16. The cables connect to the top of the screen so there is nothing in your way while creating.

Live. Dare. Create.
